

The United Enertech *Steel Rod System* was developed to provide personal convenience and a positive means of individual room or zone temperature control. The system is composed of a steel or aluminum rod, three different controllers to choose from, and several different damper arrangements.

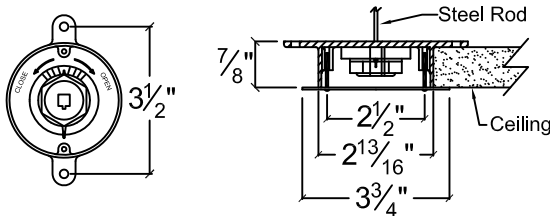

CONTROLLERS

- Model J200** (mounted on diffuser or duct)

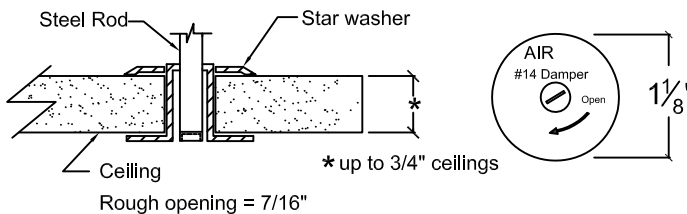

- Model J300** (ceiling recess Mtd.)
 Polished Zinc Cover Plate (Standard)

Optional Chrome Plate Prime Coat Plate

- Model J400** (architect's choice)
 Constructed of Nylon 6/6
 Includes screwdriver slotted rod

Due to continuing research, United Enertech reserves the right to change specifications without notice.
