

**EXHAUST, O.A. DAMPERS**

The Model CH-10 was developed in response to retrofit bathroom (restroom) in high rise hotels, office buildings, and apartment buildings. The units are powered by a direct couple spring return actuator. Also recommended for new construction, exhaust, intake, and on-off zone control. This is one of the most economical powered dampers on the market. It balances the contractors demand for a low cost, but well built, quality zone damper.

<b>SIZES AVAILABLE:</b>
thru 24" x 12" Rectangular
6", 8", 10", 12" Round
(Available in 24 or 115 VAC)
